

## Camfil employees in Ellwangen, Germany

Since December 2008 the first Ellwangen employees started. The order processing is set up as follows: From the office of Stuttgart Eva Krämer and from the Munich office Sieglinde Berger are on-site. As start-up support are Constanze Eick and Volker Tiedemann from Reinfeld in Ellwangen. A new colleague in the order processing is Carolin Schimo. Another new colleague is Christiane Banek. Together with Jörg Severin, a colleague from Reinfeld, she will take care of the warehouse. Johannes Roos, sales director south, and Christian Schulz, project manager "Ellwangen", are responsible for the successful foundation!

From left: Eva Krämer, Volker Tiedemann, Sieglinde Berger, Christiane Banek, Carolin Schimo, Jörg Severin, Constanze Eick, Johannes Roos und Christian Schulz

And projects were formed to undergo a very unusual expedition: "ANTARCTIC TOP AND HEART" whose goal is not only to climb the summit of Mount Vinson (the highest peak of The Antarctic), but also one of the "Seven Summits" or "Seven sisters", a well known alpine destination, then, once down and with a change of equipment, to reach the Geographic South Pole skiing.

## WHERE DO YOU FIND THE WORLD'S CLEANEST AIR, OUTSIDE THE SOUTH POLE?

If you're searching for the cleanest air in the world, join an expedition to head for the antartic. The antarctic is the only area in the Southern Hemisphere where the purest and least unpolluted air can be found.

If you want the cleanest possible environment for your electronics or pharmaceuticals production, don't head south. Use Camfil's range of Absolute High-Tech filters for cleanrooms.

2008 Camfil SpA, in Italy, supported an enterprise to South Pole. Camfil Spa decided to sponsor a consultant after many years of good collaboration and support. Now Camfil Spa have pictures and 2 flags with the stamp of the South Pole to put into a frame and exhibit in the meeting room and at some exhibitions. On the expedition's website we also find a CF logo and a link to CF's website.

You can read more about the expedition on
